University of Roehampton London

COURSEWORK 3 ASSESSMENT BRIEF

Programme	MSc Data Science		
Module Title	Machine Learning		
Module Code	CMP-L015-0		
Module Level	7	**Assessment Type(s)**	Slide submission and presentation
Word Length / Duration	See below	**% contribution to module mark**	30%
Deadline (date & time) for Submission	24 Apr 2026	**Format/Location of submission**	https://moodle.roehampton.ac.uk/mod/assign/view.php?id=2548514
Assessment Feedback date:	8 May 2026		

Learning Outcomes	**Employability and Professional Skills**
This assessment has been designed to provide you with an opportunity to demonstrate your achievement of the learning outcomes listed below. LO2: Evaluate the performance of a simple	This assessment has been designed to provide you with an opportunity to demonstrate your achievement of the following skill(s) which is(are) critical in professional context and jobs. By successfully completing this assessment, you will be able to … 1. Evaluate model performance, compare approaches, and communicate insights clearly through structured reports, tables, and visualisations. 2. Communicate technical concepts and project outcomes effectively through structured reports, presentations, and discussions.

learning systems on a real-world dataset. LO4: Evaluate the ethical concerns of applying machine learning techniques to a real-world dataset.	

Assessment Requirements

Task 1 – Group Formation

Form a group consisting of four members for the group presentation. Each group will work collaboratively to deliver one integrated literature review on AI ethics and bias**.**

Task 2 – Individual Literature Survey

Each student must review at least **one** recent peer-reviewed papers (published within the last four years) addressing issues of AI ethics, fairness, accountability, or bias**.**

- No two students within the same group may review the same papers.
- A group of four members must therefore cover at least **four** distinct research papers**.**

Task 3 – Group Presentation

Each group will deliver a 20-minute presentation, followed by 5 minutes of Q&A**.**

- The presentation should integrate all members' findings into a single coherent narrative, not four disconnected parts.
- Each member will present approximately five minutes, focusing on their individual contribution within the collective theme.
- Use appropriate academic visuals, data, and references to support your argument.

Submission Requirements

- Submit your slides with file name StudentID_MLCW3.PDF

Presentation Requirement:

- **Group Presentation:** Deliver your 20-minute presentation in class or lab at the scheduled time.

The followings are the key criteria for assessing your presentation.

1. Presentation (20%)
    a. Structure of presentation
    b. Logic flow of presentation
    c. Visual aids
    d. Delivery
    e. Time control

2. Summary of the papers (25%)
    a. Important topics and issues
    b. Accuracy
    c. Evidence of understanding of paper

3. Critical analysis (45%)
    a. Structure of papers
    b. Clarity of presentation of papers
    c. Validity of conclusions
    d. Statements of strengths and weaknesses
    e. Lessons learnt and new knowledge acquired by the students from the analysis of papers

4. Question handling (10%)
    a. Ability to answer questions competently and with confidence.

Assessment Success Guidance

To achieve maximum success in this assessment, students should go beyond simply meeting the basic requirements. High marks will be awarded for:

- **Critical Depth and Synthesis** – Go beyond summarising papers by comparing arguments, methods, and findings. Identify key themes, gaps, and implications for ethical and responsible AI.
- **Academic and Professional Quality** – Use credible, recent peer-reviewed sources (IEEE, ACM, Elsevier, Springer), and present ideas in the presentation clearly.
- **Integration and Collaboration** – Ensure the group presentation forms a cohesive narrative linking all members' findings, with balanced contributions and evidence of effective teamwork.
- **Clarity and Engagement** – Use clear structure, professional visuals, and confident delivery. Strong analytical writing and engaging presentation design will distinguish high-quality work.

Academic Misconduct:

"Academic integrity and honesty are fundamental to the academic work you produce at the University of Roehampton. You are expected to complete coursework which is your own and which is referenced appropriately. The university has in place measures to detect academic dishonesty in all its forms. If you are found to be cheating or attempting to gain an unfair

advantage over other students in any way, this is considered academic misconduct, and you will be penalised accordingly."

Further details about "Student Code of Conduct" and "Disciplinary Regulations" can be found at:

https://www.roehampton.ac.uk/corporate-information/policies/

Use of Artificial Intelligence (AI)

Please read and apply:

https://roehamptonprod.sharepoint.com/sites/portal/information/LTEU/Documents/4a%20AI%20principles%20and%20guidance%20-for%20Senate.docx

https://roehamptonprod.sharepoint.com/sites/portal/information/LTEU/Documents/4b%20Student%20Guidelines%20on%20the%20use%20of%20AI_.docx

The assessment is designed so that the use of AI during the assessment is possible. You must acknowledge any use of AI and appropriately cite all AI generated outputs. Please make sure you read and understand the assessment guidelines and ask your Module Leader if you have any questions.

**You can find the student guidance on the use of AI in the Library and Nest*

Referencing

References: Referencing any point in your discussion section(s). If you have used ideas from anywhere other than the lecture notes and tutorial examples (e.g., from a book, the Internet, or a fellow student) then include a reference showing where the code or ideas came from and label your code carefully to show which parts are your and which parts are borrowed.

You should include your reference list at the end of your report. You must ensure you use the appropriate IEEE format for your subject area.

Your referencing must use the IEEE referencing style IEEE Citation Guidelines.

It is highly recommended that you use reference management software such as RefWorks that is provided by the university. Your report should have as many references as is required.

It is your responsibility to ensure that you have actually read all the material you reference, and that the references provided in your report are legitimate and NOT AI-generated.

Mitigating circumstances/late penalties

Sometimes circumstances outside of your control may affect your studies and might prevent you from submitting work on time or attending an exam.

The University offers the ability for students to request additional time to complete an assessment or to defer an examination to a later date. If you are finding yourself in such a situation, please speak to your Academic Guidance Tutor, the Roehampton Student Union (RSU) or someone in the **Wellbeing team** first, who can support you. Further details can be found on the mitigating circumstances portal.

If you do not apply for or are not approved for Mitigating Circumstances, late penalties will apply. If work is submitted up to 14 days late, the mark will be capped at 40%; if it is over 14 days late, it will not be marked.

Resubmissions and Reassessment

If you are required to resubmit this assessment or take part in reassessment, you will be notified via Moodle and your student email. Please ensure you check both regularly. Any reassessment tasks will follow the same learning outcomes and criteria.

Submission Checklist

Before you submit, ask yourself:

Have I fully answered the assessment brief?

Have I met the word count and formatting requirements?

Is my referencing complete and accurate?

Have I declared any AI use honestly?

Have I proofread my work?

Am I submitting through the correct platform before the deadline?
